

# Trinity

PROTECTION SYSTEMS

PEACE OF MIND COMES AS STANDARD

# ALL ABOUT US

Trinity specialises in the design, provision and aftercare of fire detection, fire suppression and electronic security systems.

### OUR PRIORITIES

We operate within an ISO9001:2008 accredited quality control environment and have a clear focus on our priorities:

- Partnership with our customers
- Professional and reliable engineering
- Value for money

We also have LPS1014 3rd Party accreditation and see this as a fundamental pillar of our business.

We have extensive systems experience gained over the last 20 years, and can provide a fast response combined with local knowledge from our regional engineering sites.

### CONTINUAL IMPROVEMENT

At Trinity we look at each customer and each project individually. This ensures that we bring together the right engineering solution and the best value for money each time. Our staff are some of the best in the industry and we encourage continuous training to maintain the very highest standards.

## MORE KNOW-HOW

At Trinity, engineered solutions are our strength. We use the best equipment available, add extensive engineering knowledge and quality aftercare.

Our equipment suppliers are world leaders, our staff are comprehensively trained, experienced and committed.

### EXPERIENCE

We have a wealth of 'real' experience designing and supplying systems for all types of risk, from the local store to the city centre shopping complex, the local surgery to the county hospital, or the local police station to the largest detention centre.

We combine our own experience with that of our suppliers, our customers and our industry. The result is a knowledge store second to none.

### TRAINING

Extensive on-going operational training for both engineers and estimating staff ensure that we employ up to date technical and design criteria.

Training is provided by:

- FIA – Fire Industry Association
- Notifier Fire Systems, Manufacturer
- Gent by Honeywell, Manufacturer
- Other manufacturers to suit the equipment used.

“The University School of Medical Sciences contains a number of specialised departments – each with their own unique fire detection problems.

As a result, we needed a supplier with both a sensitive, hands-on approach and a flexible range of devices.

The Trinity team did an excellent job in meeting our demands.”

Robin Stone, Senior Engineer,  
University of Bristol,  
Building Services

## DOING THINGS PROPERLY

The tide of liability legislation means that doing things properly is essential. Health and Safety, Risk Assessment and Employment Law all demand considered solutions and quality aftercare.

### **AFFORDABLE QUALITY**

At Trinity we believe the time has come for delivering quality based on affordability and reliability.

Our aim is to offer the best price based on:

- Minimal false alarms
- Long term reliability
- Robust technology
- Comprehensive after sales support
- Considered engineering
- Customers who come back

If we do it properly, protection is optimised and the risk is minimal.

# LONG TERM RELATIONSHIPS

What we hate most is losing customers. We've got to know you and you've got to know us, why start all over again?

## **PARTNERSHIP**

We try to gain long term partners rather than just win orders. A partner who realises that whatever happens we will do our best to provide a quality service and when things go wrong, as they sometimes will, a fast and effective response.

Our clients include:

- Devonport Royal Dockyard**
- Princess Yachts**
- T-Mobile**
- Williams Formula One**
- Norwich Union**
- Kellog Brown Root (MOD)**
- MITIE Engineering Services**
- Butlins**
- Volvo**
- AMEC**
- Land Securities**
- University of Bristol**

We like our customers – we want them to like us.

So we try to be: friendly, honest, available, committed, reliable and responsive.

"The positive attitude and enthusiasm of the Trinity team always shows through. Whenever we need advice on fire protection and support matters, the quality and reliability of their service is always apparent."

Phil Shepherd, Company Fire Officer  
DML – Devonport Royal Dockyard Ltd

## A LOCAL LOOK

Based on providing local know-how and a fast and effective response, Trinity operate from regional offices. These also double for engineering stores, meeting facilities, project management offices and service co-ordination as well as being nice places to work!

Each office has a dedicated team tailored to suit their local requirements, with an overall Regional Manager to focus our energy.

### OPERATIONAL REGIONS

- London
- Midlands
- South
- South West
- Thames

“Since first working with Trinity we have been impressed by the quality of their work, their ‘can do’ approach and their positive and effective response to all of our requirements.”

John Sweeney,  
Plant Maintenance/Energy Officer  
Nuneaton & Bedworth  
Borough Council

# ACTIVITIES AND ACCREDITATIONS

Within our field of operation we offer many solutions and services:

- **Fire Detection and Alarm**
  - Hardwired
  - Radio Connected
  - Aspirated
- **Access Control/Door Entry**
- **Site Wide Monitoring Systems**
- **Loop Induction**  
(for hearing aid users)
- **Public Address and Voice Alarm**
- **Closed Circuit Camera Surveillance (CCTV)**
- **Fire Suppression**
- **Graphics Based Integration and Supervision**
- **Routine Maintenance**
- **Breakdown Service**
- **Remote Monitoring for Out of Hours Response**
- **System Design**
- **Risk Assessment**
- **Verification Audits**
- **System Programming**
- **Emergency Recovery**

A selection of our accreditations and associations:

LPS1014 3rd Party Certification – LPCB

ISO 9001:2008 Accredited – Lloyds Register Quality Assurance

FIA – Fire Industry Association – Full Member

Notifier Fire Systems – Main Engineered Systems Distributor and NESCO affiliate

Gent by Honeywell – Gent Technical Centre

Baldwin Boxall – Accredited Distributor and Installer

Assessed to ISO9001:2008  
Certificate No. LRQ0963486

LPS 1014 Certificated Fire Detection  
and Alarm System Firm  
Certificate No CFA-160
